

As Malaysia's premier utility company, we're not just looking to nature to power the demands of a growing population; we're harvesting ideas for a sustainable energy system. We're not just calculating wind speeds or hours of sunshine, we're counting the ways in which we can make a difference. It's all part of our blueprint for a better world. And today, we're expanding to Pakistan, India, Turkey, Saudi Arabia, the United Kingdom and beyond, so we can be part of the global energy transition towards a cleaner, bright future.
